

## **Salesforce Admin 2 Go by Simon Fell**

- Source code is in the source.zip file.
- AdminApp.apk is a signed build of the app ready for installation.
- Works on Android 2.1 and up.

### **Feature Summary**

- OAuth login to both production & sandbox instances. No need to login when returning to the app later.
- view recently accessed user records or search for users by name, works efficiently even for organizations with thousands of users.
- view user details including their profile photo (requires Android 2.2+) title, username and contact info.
- Contact the user via email/phone/SMS.
- Perform a password reset.
- Toggle the Active flag of the user.
- Clone the user into a new user, setting the new username, name and email address.

### **Screen Shots**

The next pages show screenshots of the various features.

## Login.

Use the menu button to select between production and sandbox.

The image shows two side-by-side screenshots of the Salesforce Admin 2 Go login interface. The left screenshot is titled 'Salesforce Admin 2 Go : Production' and the right is 'Salesforce Admin 2 Go : Sandbox'. Both screens feature a login form with the following elements:

- User Name input field
- Password input field
- ☒ Remember User Name
- Login button
- [Forgot your password?](#) link

At the bottom of the right screenshot, there are two buttons: 'Login to production' and 'Login to sandbox'.

Once you've successfully logged in once, your oauth token will be saved, and subsequent launches of the app will verify the token and then proceed directly to the list view.

The image shows two side-by-side screenshots of the Salesforce Admin 2 Go app. The left screenshot is titled 'Salesforce Admin 2 Go : Production' and displays a permissions request dialog for the user 'dev@superfell.com'. The dialog lists the following permissions:

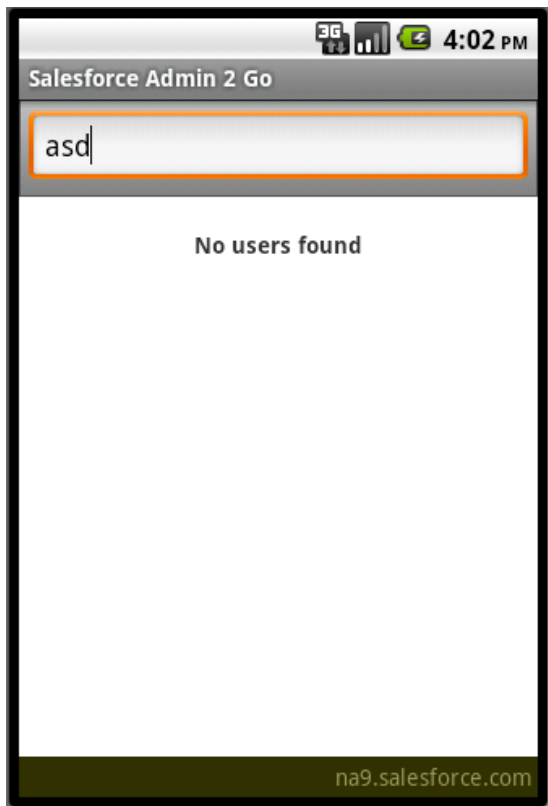

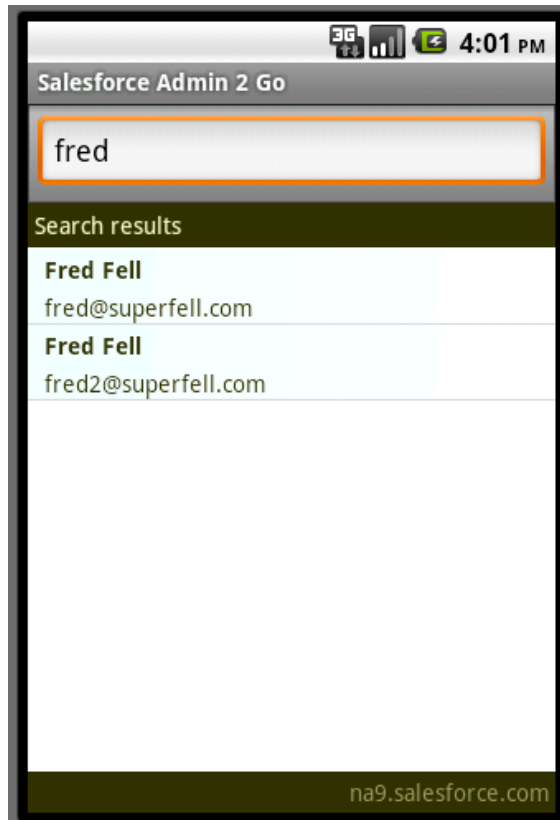

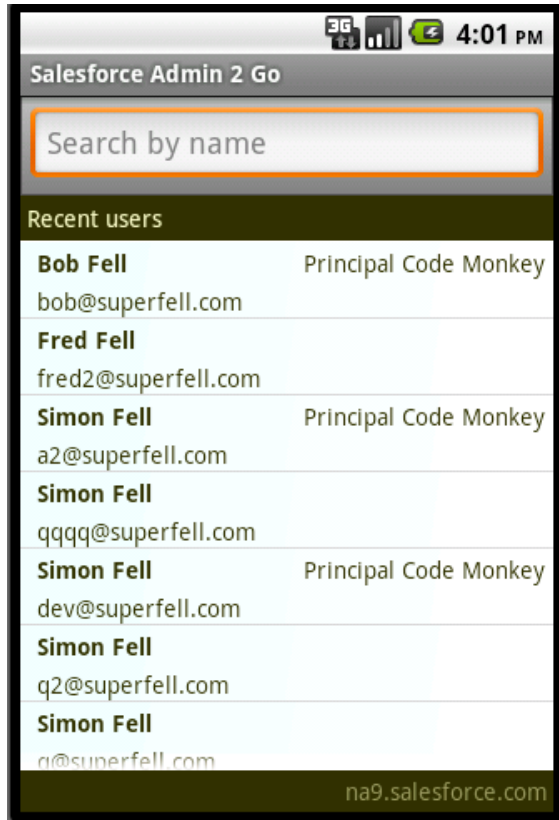

- Access to your profile
- Full access to your data
- Offline access to your account

Below the list are 'Approve' and 'Deny' buttons. At the bottom, it says 'Please ensure you trust this application before proceeding' and 'You can revoke this access at any time on your Personal Information page under Personal Setup.'

The right screenshot is titled 'Salesforce Admin 2 Go' and shows the 'Authenticating' screen with the text 'Please wait...' and a loading spinner.

## User List View

This appears after login, by default it'll show the recent list of user records (as tracked by the MRU on the server). You can do a search by name, by typing in the search box. Notice the progress spinner in the title bar while API calls are being made. Tap on a user row to goto the detail page.

## User Detail View

Here you'll see more details on the user, including their chatter profile photo (if they have one, this photo loading requires Android 2.2) You can tap any of the links in the contact section to send an email, call, or SMS the user. The action section at the bottom allows you to do a Reset Password operation, toggle the Is Active state, or start the clone user screen.

The image displays two screenshots of the Salesforce Admin 2 Go application interface. The left screenshot shows the 'User Detail View' for a user named Simon Fell. It includes a profile photo of a dog, the user's title 'Principal Code Monkey', and username 'dev@superfell.com'. Below this is a 'Contact' section with links for email, phone, and mobile. At the bottom is an 'Actions' section with a checked 'Is Active' checkbox, a 'Reset Password' button, and a 'Clone user' button. The right screenshot shows the 'Clone User' form, which prompts for a 'New username' (pre-filled with '@superfell.com'), 'First name' (pre-filled with 'Simon'), 'Last name' (pre-filled with 'Fell'), and 'Email' (pre-filled with '@gmail.com'). A 'Create User' button is located at the bottom right of the form. Both screenshots show a status bar at the top with '3G' signal, battery level, and the time '4:02 PM'.
